Professional Experience

Full-Stack Developer, *King Abdulaziz Hospital*
07/2025 – 12/2025 | makkah

Internal 937 Complaint Management System

- Reduced manual workload by 80% through workflow automation.
- Developed and deployed a production-ready full-stack complaint management system using Node.js and MySQL.
- Successfully deployed the system across 5 hospital departments and provisioned 50+ user accounts.
- Improved complaint visibility through real-time tracking and analytics dashboards.

Internal Hospital Website

- Developed and deployed a responsive internal web platform for hospital staff.
- Created a centralized communication portal used by the Media Department to publish news and announcements across hospital departments.
- Enabled content management by non-technical users without requiring development support.
- Improved internal communication and accessibility through a responsive, user-centered design.

Multi-Hospital Deployment Initiative

- Contributed to preparing the system for deployment across the Makkah Health Cluster.
- Standardized database structures for multi-hospital deployment.
- Received a Certificate of Appreciation from the Makkah Health Cluster.

Projects

Rahhal – Smart Travel Platform

02/2026 – 07/2026

- Developed AI-powered travel platform using React, Next.js, and TypeScript.
- Integrated OpenAI and REST APIs.
- Live Demo: [Rahhal.it.com](#) [📄](#) | GitHub Frontend: [Rahhal Front](#) [📄](#) | GitHub Backend: [Rahhal Backend](#) [📄](#)

Health Volunteer App (2nd Place)

10/2024

- Designed the UI/UX using Figma, creating intuitive user interfaces and user flows focused on accessibility and usability.
- Design Prototype (Figma) [📄](#)
